

Internet Credibility

When you look for something online, what do you use to help you find the information you want? How do you know which websites will be useful? Using the topic of your multimedia presentation, complete a search online.

1. Use three different search engines to understand what different sites are available. List those search engines:

Name of Search Engine

Web Address (URL)

2. List three similarities and differences among the search engines.

Similarities

Differences

3. Select three websites that appear to be the most credible. List below and provide one reason for each that explains why you find it credible.

Name of Website, with URL

Reason You Find It Credible

4. With a partner, discuss and list three factors that were important in evaluating the credibility of those sites.

1.

2.

3.
